WHAT A LOAD OF GARBAGE!!!

It's hard to believe that ___ years of people working hard to fight pollution and raise awareness ___ the environment, we still seem to have a long way to go before we succeed.

Once anographers have discovered a massive 'plastic soup' made of floating garbage in the Pacific Ocean. The gigantic waste collection had been growing slowly for ___ 60 years and is now so big it stretches from the American State of California ___ the state of Hawaii and nearly reaches Japan. It contains everything you could imagine ___ plastic bags to children's toys and even plastic swimming pools!

The 'Great Pacific Garbage Patch' as it's sometimes called, causes lot of problems. One of these is the chemicals it produces in the sea. These chemicals and small pieces of plastic are now showing up ___ fish, and obviously, this means the plastic-filled fish could make their way onto our dinner plates!

It's not all bad news though ___ the moment, a conservation group are looking into wheher or not the 100 million tons of waste can somehow be turned ___ fuel and used in a positive ways.

Let's hope they take away action now ___ the 'plastic soup' gets any larger.
