

Name - \_\_\_\_\_

Start time - \_\_ : \_\_

End time - \_\_ : \_\_

Describe the process of protein synthesis, including transcription and translation.

---

---

---

Explain the role of genes in determining an organism's traits and characteristics.

---

---

---

Identify and describe two genetic disorders caused by mutations in the DNA sequence.

---

---

---

Explain the relationship between DNA, genes, and proteins in the context of genetic information flow.

---

---

---

Describe a real-life situation where knowledge of genetic inheritance is important for understanding health or biology.

---

---

---
