

Name - _____

Start time - ___ : ___

End time - ___ : ___

Solve the following.

1. There are 59 astronauts in the spaceship. 28 astronauts blast off into space. How many astronauts are still in the spaceship?

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

2. There are 88 flowers in the garden. 57 flowers get picked by the children. How many flowers are left in the garden?

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

3. On the alien planet, there are 73 robots exploring. 37 robots go back to the spaceship. How many robots are still exploring the planet?

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

4. There are 34 fish swimming in the sea. 12 fish swim away. How many fish are still in the sea?

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

5. In the jungle, there are 47 monkeys swinging on vines. 15 monkeys climb up the trees. How many monkeys are still swinging on vines?

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

6. At the zoo, there are 12 elephants. 4 elephants go to sleep. How many elephants are still awake?

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

7. There were 19 bicycles in the bike rack. 3 bicycles were ridden away. How many bicycles are left in the bike rack?

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$
